

EOM Phal

Full Stack Developer

Full Stack Developer with 3 years of experience building scalable web applications and enterprise systems. Skilled in both frontend and backend development, with strong expertise in modern JavaScript frameworks and API development. Experienced in developing ERP systems, improving system performance, and delivering business-focused solutions.

Experience

2023 - Present

ML Mongkul Realty Co., Ltd

Full Stack Developer

Responsibilities

- Developed and maintained ERP systems for real estate and construction management
- Built scalable backend APIs using NestJS and PostgreSQL
- Designed and implemented frontend interfaces using Nuxt.js and Tailwind CSS
- Implemented dynamic approval workflows and role-based access control
- Collaborated with business teams to gather requirements and improve system usability
- Fixed bugs, optimized performance, and improved system reliability

Key Achievements

- Successfully delivered modules such as:
 - Purchase Request / Purchase Quotation / Purchase Order / Purchase Receipt
 - Inventory Management System
 - Real Estate Management System
- Improved system workflow efficiency with dynamic approval logic
- Reduced bugs and improved code quality through refactoring and testing

Projects

ERP System (Real Estate & Construction)

Tech Stack: NuxtJS, Tailwind, Element Plus UI, NestJS, PostgreSQL, TypeORM, Docker

Overview: Developed a comprehensive ERP system to manage end-to-end business operations in real estate and construction, including purchasing, inventory, and construction workflows. The system integrates multiple modules with a dynamic approval workflow to ensure process control, transparency and efficiency.

POS System (Point of Sale System)

Tech Stack: NuxtJS, Tailwind, Element Plus UI, NestJS, PostgreSQL, TypeORM, Docker

Overview: Developed a full-featured POS (Point of Sale) system to manage sale, inventory, and purchasing workflows. The business operations by integrating stock management, supplier handling, and sales processing into a single platform.

Dear Hiring Manager,

I am writing to apply for the Full Stack Developer position at your company. With 3 years of hands-on experience in developing and maintaining web applications, I have built a solid foundation in both frontend and backend technologies, and I am confident in my ability to contribute effectively to your team.

I specialize in building modern, scalable applications using Vue.js and Nuxt.js on the frontend, and NestJS with Node.js, PHP, Laravel, MySQL and PostgreSQL on the backend. I have experience designing RESTful APIs, implementing authentication and authorization, and working with relational databases. I also have practical experience with Docker and deploying applications in production environments.

In my current role, I have been involved in developing ERP systems, including modules for purchasing, inventory, construction, and real estate management. I work closely with business users to understand requirements and translate them into efficient technical solutions. This has strengthened my problem-solving skills and my ability to deliver high-quality, user-focused systems.

I am eager to bring my experience, technical skills, and strong work ethic to your organization. I am particularly excited about opportunities where I can continue to grow as a developer while contributing to meaningful projects.

Thank you for your time and consideration. I look forward to the opportunity to discuss my application further.

Sincerely

EOM Phal
